Introduction

There are many important reasons for learning biblical Greek vocabulary but three in particular stand out. First, learning just the 600 most common Greek words allows you to recognize as much as 85.7% of the New Testament. Wow! A little effort will result in a great reward! Second, it is very likely that Jesus himself spoke Greek. Many generations of New Testament scholars have assumed that Jesus conducted his public ministry in Aramaic and then the evangelists translated his teachings into Greek. If you want to know what Jesus really said, we have to work back from the Greek to the Aramaic. At best, we experience his teachings in the New Testament one step removed from the original. Scholars are increasingly recognizing, however, that Jesus mostly likely spoke Greek (see, N. T. Wright and Michael Bird, *The New Testament in Its World*, Grand Rapids: SPCK/Zondervan, 2019, p. 110). How else would he communicate with the Syro-Phoenician woman or Pontius Pilate? This transforms how we conceive of the gospels and may explain why only on particular occasions we are given his speech in Aramaic (“Talitha cum”, Mark 5:41; “Eli, eli, lema sabachthani”, Matt 27:46). The rest of the time he used Greek! Third, learning biblical Greek vocabulary will help you not only to understand the New Testament better, but also the Septuagint, the Greek translations of the Hebrew Bible used by early Christians! You can feel less guilty about struggling with your Hebrew!

The Biblical Greek Vocabulary Builder is prepared to assist students in learning high-frequency words (occurring 50 and more times) in the New Testament. Part One presents all the words that occur 50 or more times in chronological order of their frequency rank. For instance, the conjunction *kai*, which has the highest number of occurrences (f. 9162), occupies the first place on the list of Greek words arranged by frequency rank. A cluster of words within the 20-frequency

rank range is alphabetically arranged for ease of reference. Besides, different colors are used to highlight the parts of speech (see the legend on page 3). Part Two groups the words according to the part of speech they belong to. Furthermore, for the two major parts of speech—Nouns and Verbs—the words are further arranged according to their semantic categories.

Learners of New Testament Greek vocabulary notice that some words are similar as they stem from the same root letters. In Part Three, words are arranged by their roots, which will help students see the association between them. On the other hand, some words are similar but do not share the same root. Part Four presents these confusing words to spare students from the confusion they might create.

Learners of Biblical Greek vocabulary notice that some words are similar as they stem from the same root letters. In Part Three, words are arranged by their roots, which will help students see the association between them. On the other hand, some words are similar but do not share the same root. Part Four presents these confusing words to spare students from the confusion they might create.

This book aims to employ approaches that can aid memorization. Dominic O’Brien (*Learn to remember: Practical techniques and exercises to improve your memory*. San Francisco: Chronicle Books, 2000.) elucidates the following five memory arts:

- **Imagination** - transforming new information into images that can be retained in the mind.
- **Association** - connect these images to what is already known.
- **Location** - anchoring these associations in the mind.
- **Concentration** - focus fully on the information that we want to memorize.
- **Observation** - paying attention to details.

The Biblical Greek Vocabulary Builder will help you apply these memory arts. First, the illustrated Greek words that transform the words into images will provide you with the opportunity to practice the first two memory arts—imagination and association. Second, the arrangement of the words by semantic categories and the parts of speech assists in organizing these words in the mind by storing them in a particular location. Lastly, the numerous exercises for the words in the digital platform of Bible Online Learner provide practices that will help the learner gain mastery over the last two memory arts—concentration and observation.

To help improve vocab retention we have added to the Bible Online Learner exercises the learning technology of spaced repetition through a dedicated ANKI vocabulary database that corresponds with the vocabulary of this book. It is well-known that the best students of Medicine, Law, and Language have extensively used the algorithms of spaced-repetition to improve their memory and understanding.

One of the unique features of Biblical Greek Vocabulary Builder is the seamless transition it offers between analogue and digital resources. Bible Online Learner (BOL), the digital platform used in this book, and ANKI's spaced repetition technique give free access to the Hebrew Bible in the ETCBC database. Using BOL, Biblical Greek students can create their accounts and do a self-assessment to check their progress in learning new words. (Click [here](#) to watch tutorial videos on how to use BOL).

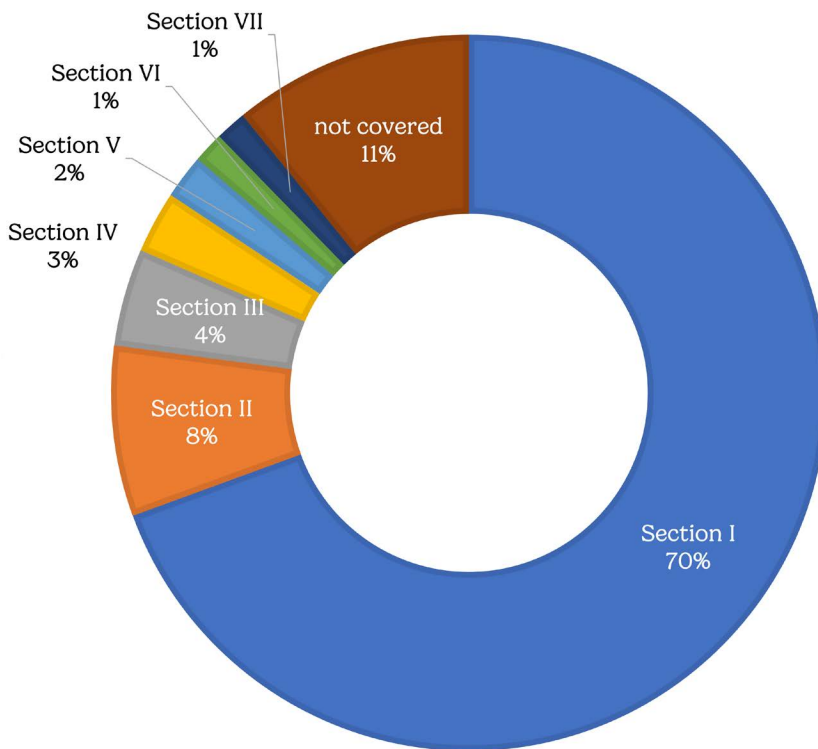

The glosses presented in this Vocabulary Builder result from many years of labor. Oliver Glanz, Cedric Vine, and Oleg Kostyuk have built on the work of well-known Greek lexicons such as BDAG, Liddell-Scott, Thayer, Louw-Nida, Newman, and Beekes. Instead of building a comprehensive dictionary, the focus was always on language learning, thus keeping the BOL glosses to a minimum. When using the BOL we have made

sure that both English and American spellings will be accepted. In addition, students who take the BOL exercises do not have to type in all glosses of a Greek word to get a correct answer. It is enough to type just one English gloss. However, when verbs are being presented, it is crucial that the student consults the verbal stem (verbal stem information is automatically provided in the exercises) and type the gloss that belongs to the meaning of that particular stem.

Finally, BOL and ANKI are optimized in such a way that they can be used not only with computers but also with mobile devices and tablets. So you can have your vocabulary Builder with you at any time and any place. We hope this book will be a handy tool for Biblical Greek students to build their word power and enjoy reading.

PART I

Greek Words Arranged by Frequency Rank

The following statistical information depicts the percentage that the words in each section covers of all Greek words in the Greek New Testament (GNT).

- **Section I** covers 69.5% of all Greek words in the GNT.
- **Section II** covers 7.7% of all Greek words in the GNT. **Section I and II** together would cover 77.2% of all Greek words in the GNT.
- **Section III** covers 4.4% of all Greek words in the GNT. **Section I-III** together would cover 81.6% of all Greek words in the GNT.
- **Section IV** covers 2.8% of all Greek words in the GNT. **Section I-IV** together would cover 84.4% of all Greek words in the GNT.
- **Section V** covers 2% of all Greek words in the GNT. **Section I-V** together would cover 86.4% of all Hebrew words in the GNT.
- **Section VI** covers 1.4% of all Greek words in the GNT. **Section I-VI** together would cover 87.8% of all Greek words in the GNT.
- **Section VII** covers 1.4% of all Greek words in the GNT. **Section I-VII** together would cover 89.2% of all Greek words in the GNT.
